

Printer option

Dual-sided upgrade kit – PMY1-KTDS

Quickly upgrade a Primacy Simplex to a Duplex model

Upgrade your simplex printer easily

The dual-sided upgrade kit allows the end-user upgrading its Primacy Simplex to a Duplex printer in a few seconds.

No need for a module installation within the device, the Primacy simplex printer is duplex ready, so the use of an encrypted software located in the upgrade key makes the operation very simple.

Thanks to the duplex activation wizard delivered with the Evolis Premium Suite software, the user gets instant support to perform the upgrade in a few clicks.

Protect your investment!

Using Evolis Primacy allows you to upgrade your card printer anytime, with options that add value to your cards:

- Duplex mode
- Magnetic encoder
- Various chip encoders, for contact and contactless smartcards.

Anytime, ...

Evolis Primacy printers evolve with the user needs, offering high flexibility and reliability at a very affordable cost.

No need for a trade-up, your Primacy is ready today for tomorrow's needs.

... Anywhere!

Evolis focused on the ease of installation of each upgrade and option. So the operation can be performed on-site by the end-user, or in a workshop by your Evolis Business Partner.
